Education & Certifications

B.S. Computer Science and Cybersecurity

Sept 2022–Mar 2026

University of Washington

Anthropic Claude Certified Architect (Foundations), ISC2 Certified in Cybersecurity

Anthropic Academy, ISC2

Experience

The Estee Lauder Companies

June 2025–Aug 2025

Operational Technology Cybersecurity Analyst Intern

New York City

- Deployed and configured Dispel infrastructure across global OT systems supporting over 62,000 employees, ensuring secure remote vendor access and reducing third-party exposure.
- Onboarded and optimized Armis for real-time asset visibility and threat detection across OT/IoT networks, aligning with the cybersecurity framework protecting \$15.6B in annual revenue.
- Developed Power BI dashboards to visualize asset visibility, risk metrics, and network segmentation data, utilizing Claude to assist with DAX query optimization and data modeling, enabling leadership to track security posture

Bose

Jan 2022–Sept 2022

Roadshow Engineer

International

- Managed sensitive project files in a secure Git repository across a 3-country roadshow, enforcing version control policies and access controls to prevent unauthorized exposure of proprietary demo assets.
- Designed and delivered 15 VR demonstrations using C++ with secure communication channels between hardware systems, ensuring data integrity and compliance with security requirements across all international deployments.

Microsoft

July 2021–Sept 2022

Certification and Accessibility Tester

Redmond

- Conducted security testing across 500+ Microsoft products, analyzing network calls and crash dumps to identify vulnerabilities and strengthen product integrity ahead of Microsoft certification.
- Developed PII protection protocols adopted by the testing team, reducing risk of personal data exposure during active test cycles and contributing to a more resilient release pipeline.

Technical Projects

Secure Home Lab Network Architecture & Hardening | *pfSense, Proxmox, Suricata, ntopng, [GitHub](#)*

- Built a production-grade home lab on Proxmox with pfSense as the perimeter firewall, segmented into 4 VLANs (Trusted, Lab, IoT, Management) using Ubiquiti UniFi switches with documented default-deny firewall rules.
- Deployed Suricata IDS/IPS with custom rules and ntopng for real-time traffic analysis, tuning from 300+ daily false positives down to ~15 actionable alerts through iterative signature management.

DevSecOps Security Scanning Pipeline | *GitHub Actions, Semgrep, Trivy, Checkov, Gitleaks, [GitHub](#)*

- Built a CI/CD security pipeline with 3 GitHub Actions workflows integrating SAST, secret detection, dependency scanning, container image scanning, and IaC policy checks with SARIF upload to GitHub Security tab.
- Authored 17 custom Semgrep rules detecting hardcoded credentials, SQL/command injection, weak cryptography, and Dockerfile misconfigurations; includes pre-commit hooks and a local scan runner script.

Infrastructure Hardening Playbooks | *Ansible, CIS Benchmarks, auditd, UFW/firewalld, [GitHub](#)*

- Developed 7 modular Ansible roles enforcing 60+ CIS Benchmark controls across Ubuntu and CentOS, covering SSH hardening, kernel sysctl tuning, firewall configuration, and audit logging.
- Created an automated 40+ check verification script with CIS benchmark mapping and a Vagrant test environment for validating playbooks before production deployment.

Custom Password Manager & Credential Security App | *Python, AES-CBC, SHA-256, [GitHub](#)*

- Developed a CLI-based password manager in Python with AES-CBC encryption at rest via PyCryptodome, SHA-256 master password hashing, and full credential lifecycle management including generation, rotation, encrypted backup, and secure erasure.

Skills and Tools

Splunk SIEM, SentinelOne, CrowdStrike, Microsoft Sentinel, Security Operations, SOC analysis, Nessus/Tenable, Metasploit, Wireshark, Nmap, Burp Suite, Kali Linux, Cisco ISE, Palo Alto Firewalls, Illumio, network segmentation, TCP/IP, DNS, OpenVPN, WireGuard, Active Directory, Docker, Kubernetes, Terraform, Task Automation, Cloud Security, AWS, Azure, Log Analysis, Bash, PowerShell, NIST CSF, Zero Trust, SOC 2, ISO 27001, FedRAMP, HIPAA, IAM Access Analyzer, SSO/MFA, Network Security, Endpoint Security, incident detection and response, threat hunting, troubleshooting, root cause analysis, risk analysis, vulnerability management, encryption and hashing, virtualization, vulnerability scanning
